

ELLIE AND GAZ ARE GOING TO THE PARK.

Guide them on their walk to help avoid **natural gas** and **electric dangers**.

SAFETY REMINDERS:

 If you see a **kite or balloon close to power lines**, be sure to stay away and notify an adult.

 Stay at least **35 feet away from downed power lines or fallen wires** and any objects that could be touching them.

 **Bubbling in standing water**, a **rotten egg smell** or a **hissing sound** may be signs of a natural gas leak nearby. Tell an adult to call CenterPoint Energy at **800-752-8036** and **911** if you spot any of these signs.

 **Colorful flags** in the ground show us where utility lines are, like gas, water, electric and internet. These help tell us where to avoid digging, so be sure not to play with or remove the flags.

 Do not insert any objects inside **electric outlets**.
